EXECUTIVE PROGRAM 2020

THE EMERGING IMPORTANCE OF SPACE LAW

Monday 18th and Tuesday 19th May 2020
From 1:45 pm to 3:30 pm and 4:00 pm to 6:00 pm

—
This event is being conducted as a webinar.

This course covers how space law is evolving to become an in-demand area of expertise for nations as well as corporations that seek to exploit the increasingly profitable industries associated with space.

Surprisingly, Singapore has a robust and growing space industry already comprising 30 companies employing over a 1000 individuals. Moreover, given its proximity to the equator, its advanced and mature industries and other capabilities, Singapore it is an optimal future launch site for rockets that could be especially supported by its strong maritime industries.

Since 2013, Singapore has had a national space office and multimillion dollar satellite

development fund designed to promote innovation in satellite technology. Academically, there are a number of institutes that are pushing innovation in the area of satellites.

Its relatively nascent stage notwithstanding, it is likely that space will be an important part of the future of Singapore, similar to its increasing commercial importance internationally. As such, there is a growing need to appreciate the various aspects of space law relevant to Singapore, especially universal areas of importance such as space debris mitigation and satellite licensing.

Broadly, the goals of this course include: (i) Exposing the participants to Space Law & Policies ; (ii) Building the confidence & capability of the participants in the application of Space Laws & Policies ; and, (iii) Enhancing the understanding of nuances in Private & Public Space Law and its implications.

EXECUTIVE PROGRAM **2020**

THE EMERGING IMPORTANCE OF SPACE LAW

SPEAKER'S PROFILE

Dov Greenbaum Professor of Law

Professor Dov Greenbaum teaches law at the Interdisciplinary Center Herzliya, a private university in Israel. He is also the Director of the Zvi Meitar Institute for Legal Implications of Emerging Technologies.

Concurrently, he is also a researcher in the department of Molecular Biophysics and Biochemistry at Yale University. Prof. Greenbaum has degrees and post-doctoral fellowships from Yeshiva University, Yale University, University of California, Berkeley, ETH Zurich and Stanford University.

In addition to his academic affiliation and training, he is also an intellectual property attorney (California & USPTO), with experience in the fields of biopharmaceutical litigation, and Hi-Tech patent drafting and prosecution, including drafting in the fields of robotics, software, computer hardware and defense. In addition to his lecturing abroad, Professor Greenbaum has also taught a number of courses at Singapore Management University.

DATES AND VENUE

Dates : Monday 18th and Tuesday 19th May 2020

Length : Total 7.5 hours

This event is being conducted as a webinar.

CPD ACCREDITATION

CPD points: 8 Public CPD Points

Area of practice: Government

Training Level: Foundation

Participants who wish to obtain CPD Points are reminded that they must comply strictly with the Attendance Policy set out in the CPD Guidelines. For this activity, this includes logging in at the start of the webinar and logging out at the conclusion of the webinar in the manner required by the organiser, and not being absent from each day of the entire activity for more than 15 minutes. Participants who do not comply with the Attendance Policy on any particular day of the activity will not be able to obtain CPD Points for that day. Please refer to <http://www.silecpdcentre.sg> for more information.

Participants who attend Day 1 and comply strictly with the Attendance Policy on that day may obtain 4 Public CPD Points.

Participants who attend Day 2 and comply strictly with the Attendance Policy on that day may obtain 4 Public CPD Points.

PROGRAMME OVERVIEW

DAY 1 Monday, May 18th, 2020

MODULE	TIME	SYNOPSIS
Space Policy		
The history of space exploration and its importance in development of international space law (1.75 hours)	1:45 pm > 3:30 pm	<ul style="list-style-type: none"> - Introduction to Space Law & Space Exploration - Examination of the evolution of international space law in light of historical events - Limitations of international space law in light of the nature of its development
International, national, and non-governmental bodies in Space Law (2 hours)	4:00 pm > 6:00 pm	<ul style="list-style-type: none"> - Reviewing the roles of various regulatory and non-regulatory bodies in developing space law - Assessing the roles of current regulatory and non-regulatory bodies in the modern development of new space law - Special focus will include scientific bodies and militaries in past, current and future development of space law

DAY 2 Tuesday, May 19th, 2020

MODULE	TIME	SYNOPSIS
Public and Private Space Law		
Public Space Law (1.75 hours)	1:45 pm > 3:30 pm	<ul style="list-style-type: none"> - Foundational principles of public space law - Assessing legal terminology in public space law - Planetary Protection Laws - Debris Mitigation Laws - Criminal and Terrorist activities in space
