

EXECUTIVE PROGRAMME 2024

Generative AI: A practical approach to governance and due diligence

DATE: Tuesday 16th July 2024

From 2pm to 3:30pm, Singapore Time (GMT+8)

Location: Assas campus, Singapore – *ONLINE ATTENDANCE IS ALSO AVAILABLE*

Generative AI (GAI) is transforming business productivity, creativity, and customer experience. This seminar offers a practical guide to AI governance, addressing legal and ethical issues.

Artificial Intelligence is certainly not new; however, recently commercialised Generative AI (GAI) is expected to have the largest impact on businesses, particularly on productivity, enhancing creativity, innovation, and customer experience.

There are nonetheless significant risks and challenges in adopting GAI at scale. As adoption outpaces regulation in many jurisdictions, legal professionals

will increasingly be called upon to provide first-line guidance to clients on the legal, ethical, and corporate governance issues that need to be addressed.

Artificial intelligence's power of disruption is also becoming an increasingly important consideration in M&A transactions across all sectors and jurisdictions. It is incumbent on legal professionals to consider the impact this will have on their existing investment due diligence processes.

This seminar thus provides an introduction to a practical, principle-based approach to AI governance and due diligence to enable the adoption, use, and investment in Generative AI in a responsible, ethical, and compliant manner.
