

LL.M. International Business Law

— SINGAPORE —

Our LL.M. programme deals mainly with practical case studies and certain key subjects with a multidisciplinary approach. It prepares students and professionals for operations such as large acquisitions or market transactions, cross-border mergers, complex financing, restructuring, LBOs, financial engineering, and industrial projects.

These are elaborate operations, offering difficulties that often lead to innovative solution-seeking. Used as educational material, they allow the legal practitioners to study and analyse the legal, financial, or accounting issues they provide. Thus, contracts, guarantees, financing, and international trade litigation, among other essential subjects, are being studied from various angles.
